PROFILE

Software Engineer and Front-End Developer specializing in responsive, scalable, and user-focused web applications using Angular, TypeScript, JavaScript, HTML5, CSS3, SCSS, Bootstrap, and Tailwind CSS. Skilled in API integration, reusable component design, asynchronous programming, responsive layouts, clean UI implementation, Object-Oriented Programming (OOP), data structures, algorithms, and problem solving. Portfolio: [Personal Portfolio](#).

TECHNICAL SKILLS

Frontend: Angular, JavaScript ES6+, TypeScript, HTML5, CSS3, SCSS, SASS, Bootstrap 5, Tailwind CSS, Responsive Design
Core Concepts: API Integration, RxJS, DOM Manipulation, Asynchronous JavaScript, Component-Based Architecture
Programming: C, C++, Java, Python, Object-Oriented Programming (OOP), Data Structures, Algorithms
Tools & Hosting: Git, GitHub, VS Code, Chrome DevTools, Vercel, Regex Validation
Databases: MongoDB Basics, MySQL Basics

EDUCATION

Bachelor of Software Engineering

Graduated: June 2026

Faculty of Computers and Artificial Intelligence, Capital University (Formerly Helwan University) | Cairo, Egypt

GPA: 3.3 / 4.0 (Very Good)

PROFESSIONAL EXPERIENCE

Programming Instructor

October 2024 - Present

3C - Creative Children Community | Cairo, Egypt

- Teach programming fundamentals using Scratch, Python, HTML, CSS, and App Inventor.
- Create interactive lessons that simplify coding, logic, and problem-solving concepts for students.
- Guide students in building practical games, applications, and websites through project-based learning.
- Prepare educational materials and provide personalized support based on student learning levels.

PROJECTS

LoCum - Healthcare Staffing Platform (Freelance Project)

[Live Demo](#)

Angular, TypeScript, SCSS, API Integration

A healthcare staffing platform that helps care homes and nursing facilities request qualified PSWs (Personal Support Workers) efficiently through a responsive and modern user interface.

- Co-developed responsive healthcare staffing interfaces and implemented reusable front-end components alongside Abdulrahman Mohamed.
- Integrated APIs for dynamic data handling and smooth user interactions.

Student Management System (Freelance Project)

[Live Demo](#)

Angular, TypeScript, SCSS, Responsive UI

A freelance student management system built for teachers to monitor attendance, absences, financial records, and manage student administration through a clean dashboard.

- Implemented teacher workflows for attendance tracking, absence reporting, fee management, and student profile administration.
- Delivered a responsive web interface with secure login and a polished user experience for education management.

EvoShop (Route Academy Project)

[Live Demo](#)

Angular, TypeScript, RxJS, Tailwind CSS

Full-featured e-commerce web application built with Angular featuring authentication, cart management, dynamic API integration, and user-focused payment workflow simulation.

Movie Night (ITI Project)

[Live Demo](#)

Angular, TypeScript, Bootstrap, API Integration

Movie discovery web application integrated with external movie APIs to fetch and display real-time movie listings, handling asynchronous data loading and error states smoothly.

Angular Q&A Platform (Route Academy Project)

[Live Demo](#)

JavaScript, HTML5, CSS3, DOM Manipulation

An interactive Questions & Answers quiz platform featuring dynamic behavior, heavy DOM manipulation for real-time score calculation, and automated instant feedback loops.

MedGuid (Final Graduation Project - A+ Grade)

[Live Demo](#)

Angular, TypeScript, SSR, SCSS, API Integration

Healthcare platform connecting patients, doctors, and administrators with appointment booking, medical records, and role-based dashboards, enhanced by an integrated AI Health Assistant.

- Developed responsive patient, doctor, and admin interfaces using Angular with SSR and standalone components.
- Integrated front-end workflows with backend APIs for appointments, medical records, and role-based access.

Weather App (Route Academy Project)

[Live Demo](#)

JavaScript, Bootstrap, Async API

Interactive weather application using asynchronous JavaScript to fetch, retrieve, and render live weather updates dynamically based on location data.

Bookmark App (Route Academy Project)

[Live Demo](#)

JavaScript, LocalStorage, CRUD, Bootstrap

Web application built to handle full CRUD operations for saving, managing, and indexing custom browser bookmarks using browser LocalStorage.

Mealify (Route Academy Project)

[Live Demo](#)

HTML5, CSS3, Keyframes, Dark Mode

A responsive creative restaurant landing page featuring intricate CSS keyframe animations, responsive grid design, and dark mode theme switching toggle.

COURSES & CERTIFICATIONS

Front-End Web Development - Route Academy

March 2025 - September 2025

- Deeply studied Angular, JavaScript, TypeScript, SASS, Bootstrap, Tailwind CSS, APIs, Git, hosting, and async architecture.
- Successfully developed and deployed multiple production-ready front-end web applications.

MEAN Stack Development - Information Technology Institute (ITI)

July 2025 - August 2025

- Specialized in full-stack web development with a primary focus on mastering **Angular** for front-end architecture.
- Developed scalable web applications using the MEAN stack (MongoDB, Express.js, Angular, Node.js).

VOLUNTEER & EXTRACURRICULAR ACTIVITIES

- Helwan ICPC Community:** Practiced competitive programming and rigorous problem solving using C++.
- Training Camp - Helwan:** Solved complex algorithmic challenges using C.
- Minders'23 Workshop:** Completed introductory mentorship workshop in HTML, CSS, and modern JavaScript.
